

Sint Maarten, September 25 2017

Dear Relation,

Hurricane Irma has caused severe destruction to the island of Sint Maarten, which includes the Mental Health Foundation (MHF), the only institution which provides psychiatric care on the Dutch side of Sint Maarten and the surrounding islands Saba and St. Eustatius. Our care products consist of clinical care, crisis intervention, admissions, daycare, short/long stay, Faraja daycare center and ambulant care.

MHF has damages to the building, but some significant damages to our supporting facilities like our vehicles which are used for providing crisis/acute care, ambulant care and bus to transport our clients to daycare center.

We also need supplies to be able to continue to support our clients of which many are homeless, has limited food and drinking water and basic amenities.

At this moment we are in urgent need of the following:

- A bus to transport patient to our Faraja Daycare Center
- One vehicle to provide crisis/acute care and two vehicles for ambulant care
- Exterior Paint
- A special matrass bed for the crisis room
- Food, drinking water and basic amenities for our clients
- Medication

We at MHF highly appreciate donations received for a rapid, full recovery of our services. Every contribution helps!
