

Joint Afternoon Symposium

Dutch Society for Veterinary Epidemiology & Economics
&
Dutch Society for Wildlife Health

Interventions in wild & domestic animals: synergy or antagonism?

Program

- 12:00 Registration, tea/coffee and lunch (only for pre-registered)
- 13:00 Transmission quantification for multi-host infections: example badgers and cattle with bovine Tuberculosis
Mart de Jong (Wageningen University & Research)
- 13:30 Deltamethrin as agent for tick control and disease prevention
Sip van Wieren (Wageningen University & Research)
- 14:00 Preparing for the introduction of wolves in The Netherlands
Ellen van Norren (Zoogdiervereniging)
- 14:30 Tea/coffee
- 15:00 Quantification of visits of wild (bird) fauna to a free-range layer farm located in an avian influenza virus hotspot area
Armin Elbers (Wageningen Bioveterinary Research)
- 15:30 Salmonella *spp.* infections in dairy cattle: is there any reason to go on a wild-goose chase?
Maarten Weber (Gezondheidsdienst voor Dieren)
- 16:00 **Keynote lecture:** SF in wild boar: alien species, epidemiological uncertainties and ecological modelling
Hans Hermann Thulke (Helmholtz Centre for Environmental Research)
- 16:45 Drinks

Thursday November 1st, 2018

Lecture hall 'Paard', Yalelaan 114, Uithof, Utrecht

Registration for DSWH-members: dutchwildlife.nl,

VEEC-members/students/other: bestuur.veec@gmail.com

DSWH/VEEC-members: € 0, students (pre-registration only): € 0, non-members: € 20

In the morning VEEC & DSWH have different programs!
